

Questions to Ask Your Doctor

About Genetic Testing for PID and/or Congenital Neutropenia

- + Have I had a genetic test?
- + If I had genetic testing done before, should I have it done again since there are now tests that look at over 400 genes?
- + There are free genetic tests available with a doctor's referral. Do I qualify for one?
- + Is there a chance my diagnosis might change depending on the results of a genetic test?
- + Would my treatment change if a genetic test finds that I have a specific type of PID?
- + Are there any clinical trials that I might qualify for based on the results of a genetic test?
